EDUCATION

Virginia Tech | Blacksburg, VA
M.Eng.– *Computer Science Applications* GPA: **3.97**/4.0
Concentration: *Software Engineering* Aug. 2024 - May 2026

B.S.– *Computer Science* | ***Minor*** – *Music Technology* GPA: **3.92**/4.0
Aug. 2021 - May 2025

EXPERIENCE

Republican National Committee | Washington, D.C. Jun. 2025 - Aug. 2025
Technology Intern

- Utilized full-scope of *PostgreSQL* database to develop web application platforms.
- Exercised proficiency in *HTML*, *JavaScript*, *Python*, and *Python Django*.
- Collaborated with development team, implementing *Agile Development Strategies* (weekly sprints).

Virginia Tech Computer Science Dept. | Blacksburg, VA
Undergraduate Research Assistant May 2024 - Dec. 2024

- Led group of undergraduate students to develop multi-platform Appalachia hiking application, using *JavaScript*, *React Native*, and *Python*.
- Applied organization techniques through collaborative coding practices with *GitHub*.
- Conducted research on smart notification systems focused on engaging edge case users.

Undergraduate Teaching Assistant May 2024 - Jul. 2024

- Provided academic support to undergraduate students on comprehension of concepts in complex data structures (*Hash Tables*, *Binary Trees*, *Graphs*) and algorithms (*Quick Sort*, *Dijkstra's Algorithm*, etc.).
- Assisted undergraduate students with programming assignments, focused on good debugging practices, code readability, and test-driven development.
- Reinforced students' knowledge of *Object-Oriented* and *Java* programming.

PROJECTS

Retail Inventory System | Marine Corps Community Services Jan. 2026 - Present
Graduate Capstone Project

- Develop full-stack web application using S*pring Boot API Framework*, *React*, and *Material UI* to identify inventory issues, provide real-time visibility, and integrate machine learning pipeline for automated detection.

Full Stack Budgeting Application Dec. 2025 - Present

- Designed and developed responsive web application, allowing users to track income and expenses.
- Built secure backend using *FastAPI* and *SQLModel* with *JWT*-based authentication.
- Implemented dynamic, component-driven frontend using *React* and *TypeScript*.

Full Stack Bookstore Aug. 2025 - Dec. 2025

- Developed full-stack web application using relational database, *Java*-based backend services, and *TypeScript/React* frontend.
- Implemented using *RESTful APIs*, data models, and reusable frontend components.

LEADERSHIP

Sigma Phi Epsilon | Blacksburg, VA Aug. 2025 - Present
Graduate Scholar, Virginia Kappa Chapter

- Serve as resource and mentor to 130+ undergraduate members, supporting leadership growth, academic achievement, and career development.
